REGULATIONS, HIERARCHIES, AND CONDITIONING: THE THREE LEVELS OF HAZARD CONTROLS – 8 HRS

Regardless of the industry, high-reliability hazard control requires more than regulatory compliance. For every hazard, there must be a hazard control. Some of these hazard controls are mandated by federal law or national consensus standards. With these regulations as minimal requirements, the hierarchy of controls provides a methodology for best practices in finding the most effective hazard controls. However, even with these controls in place, a third tier exists in which employees must be trained and conditioned to identify what these controls are but also when,

where and how to use them - in real time. This situational awareness can often be the difference between incidents or a safe work practice, so conditioning to identify hazards in real time, locate and use the proper control is imperative. This conditioning can be accomplished using a 'play-book' approach based on the most effective hazard controls. However, this conditioning is useless without the appropriate regulations, hazard controls and training already in place. Ultimately, these three levels of hazard controls are necessary to create a high-reliability safety culture.

Investigations are conducted to meet legal compliance, but more importantly to help prevent reoccurrences. Therefore, it is essential to ensure those who are responsible for investigating incidents are properly trained. NEW EXERCISE: WEST COAST SWING – 12 HRS

West Coast Swing is a slotted partner dance. The follower travels back and forth in the slot dancing straight through the lead. The leader consistently moves a minimum amount (at mid-way point) to his sides, barely out of her way.

The swing dance is characterized by an elastic look that results from its extension-compression technique of partner connection and is danced primarily in a slotted area on the dance floor. The dance includes 6-count and 8-count patterns: Starter Step, Sugar Push; Left Side Pass; Right Side Pass; Tuck Turn; and Whip. All other moves in West Coast Swing are variations of these basic patterns. The Anchor Step is a common ending pattern. The class prepares the participant to practice what they learn at the local dance venues. Participants need footwear or dance socks that allows them to swivel easily. A partner is needed. **There will be no class Nov. 21.**

Megan Murillo is a world changer

Teaching helps this former COM student shape the futures of young children

Megan Murillo is a world changer.

The 2007 graduate of Santa Fe High School is a second-year pre-kindergarten paraprofessional at Roy J. Wallom Elementary School, where she helps youngsters learn the foundations of reading, writing and comprehension.

She also instills a love of learning, values and morals that will serve her students well throughout their lifetimes.

Megan had dreams of becoming a dentist until being a mother changed her direction for good.

After high school, she took classes at College of the Mainland, got married and had two boys. As she observed what her children's pre-school teachers did and the impact they made on her children, Megan realized she wanted to do the same.

She enrolled a second time at COM, this time entering the college's Associate of Arts in Teaching program. After two semesters, she earned a certificate that allowed her to work as a paraprofessional.

This fall, her love of teaching will take her to the University of Houston-Clear Lake where she will work to complete a bachelor's degree, then a master's. Her goal is to teach math or science in an area high school someday.

"Right now, I love every part of my day," Megan says. "I get to the school about 7:30 each morning so I can be among the first to see my students. It's important for children to love going to school."

Megan works beside a degreed pre-kindergarten teacher to help her class of 22 get the most out of every day.

"My favorite part is reading to the children," she says. "I love watching them take an interest and engage through a story."

She can even tell you her favorite children's book—*Big Bear, Brown Bear, What Do You See?* by Bill Martin, illustrated by Eric Carle.

Good teachers come from various backgrounds, interests and skills, Megan affirms.

"Teaching is very rewarding," she says. "I've met teachers who had other careers but switched to teaching because they found it more meaningful. A good teacher can help a child love learning and point them toward their future."

And though teachers have various aptitudes, good ones are patient, have compassion, and "get to know" and understand their students, she says.

"Not every child learns the same way; some come from home problems and stresses of their own. A good teacher will get to know and understand their students and find ways to help each one learn.

"COM helped me prepare for what I do," she says. "The program gave me an opportunity to observe classes at all grade levels."

Now that she is teaching, does Megan miss her "original dream" of being a dentist?

"Maybe on paydays," she laughs. "But I've found what I love, a place to make a difference. I wouldn't change it for the world."
