About UDSMR

Uniform Data System for Medical Rehabilitation (UDSMR) is a division of UB Foundation Activities Inc., a not-for-profit corporation affiliated with the University at Buffalo, The State University of New York. Founded in 1988, UDSMR administers the world's largest medical rehabilitation database, and its instruments provide the field with a common language and measurement tools for outcomes and functional assessment. CMS has adopted UDSMR's FIM™ instrument as the basis for the IRF PPS, and UDSMR provides exclusive training and support to the agency.

Laredo Rehabilitation Hospital
Laredo, TX
2015

Fourteen Ernest Health hospitals were ranked among the nation's best in 2015, from among 782 inpatient rehabilitation facilities.

Ernest Health's rehabilitation hospitals once again were ranked in the Top 10% of inpatient rehabilitation facilities nationwide this past year.

Throughout the years, our hospitals have consistently been recognized for our patient care by the Uniform Data System for Medical Rehabilitation (UDSMR), a non-profit corporation that was developed with support from the National Institute on Disability and Rehabilitation Research, a component of the U.S. Department of Education.

Fourteen Ernest Health hospitals were ranked among the nation's best in 2015, from among 782 inpatient rehabilitation facilities. This means that in the communities we serve, we provide our patients with the highest level of rehabilitative care available anywhere in the United States.

Our care was recognized as being:

- Patient-centered
- Effective
- Efficient
- Timely

Through UDSMR, our rehabilitation hospitals collaborate with peers throughout the United States to share information and to continue to establish best practices for patients. This helps us elevate rehabilitative care for everyone across the nation.

Ernest Health's rehabilitation hospitals provide specialized rehabilitative care to patients recovering from disabilities caused by injuries, illnesses, or chronic medical conditions. Our hospitals are located in Arizona, Colorado, Idaho, Indiana, New Mexico, South Carolina, Texas, Utah, and Wyoming. Each hospital is managed locally to best meet the needs of each community.
